

# Calcium

By: Park

## About Calcium

- The symbol of Calcium: Ca
- Atomic Number: 20
- Atomic Mass: 40.07
- Number of protons and electrons: 20
- Number of neutrons: 20
- Color: silvery

## History of Calcium and occurrence of Calcium

### History

- Ancient Roman scientist first discovered calcium. Roman was working more about calcium but they couldn't do any thing with calcium until 1808. In England Sir Humphrey Davy found more information about calcium which is electrolyzed a mixture of lime and mercuric oxide.

### • Occurrence

- Calcium occurs most commonly in sedimentary rock in the minerals calcite, dolomite and gypsum.
