

Neon

By: Claire

10
Ne
Neon
20

Basic Information

- Atomic Number- 10
- Atomic Mass-20.18
- Boiling point- -246.048
- Symbol- Ne
- Classification- Noble Gases
- Colorless, tasteless, odorless noble gas.

More Information

- Discovered by William Ramsay, a Scottish scientist in 1898

Protons- 10
Electrons- 10
Isotopes- 8
