

My Poem about Chemistry

By Nicole Herman

Yeah, so this poem is supposed
To be about Chemistry
But nothing really rhymes
With that except ministry
Iodate, Nitrate, and Chlorate
See we learn new compounds too
There's so much I never knew
Mrs. Nuno tells us

The element chart is our friend

I don't think so

But I guess we'll find out

In the end

Loads upon loads of difficult labs

Writing equations, making observations

While keeping tabs...of our results

I have got to do well in this Chemistry class

If I don't do well, then I might not pass.

I am sorry this poem is bad.

These words were really the best ideas I had.
