

## Chemistry with Mrs. Nuño

By Jessika Mitchell

Chemistry's great when Mrs. Nuño's your teacher,  
You'll learn many things, about atoms and their features.  
You can't go wrong learning chemical symbols,  
Did you know that Ag is used to make thimbles?  
Labs are much fun, blowing bubbles and such,  
I have to say, chemistry's a must!  
We study solids, liquids, and gases,  
Scientific calculations take up all our classes.

Element quizzes, and ions are fun,  
But sometimes the memorization makes me want to tear out  
my hair and run.

Each day we learn new and interesting things,  
I'm so disappointed when the bell rings.  
Mrs. Nuño is defiantly the best,  
Her humor and intelligence never rest.  
So everyone lets get our books out,  
Its chemistry guys!  
Come on, don't pout!
