

Chemistry poem  
By :Terese Reyes

I started this year  
Not knowing what to expect  
And then I went to Chemistry  
And found a favorite subject  
Atoms, formulas, elements galore  
One moment with you Ms. Nuno is never a bore  
I'm not going to lie I was scared at first  
The equations were hard and I felt immersed  
As the semester continued curiosity only grew  
Above and beyond to anything I once knew  
I hated conversions and didn't have a clue  
About what it is I was suppose to do  
I jumped my hurdle, I ran my race  
Now these conversions are no troubling case  
Studying hard not willing to fail  
No one could stop me on this scientific trail  
This is only the start of my chemistry career  
When I study marine bio I will have no fear  
Thank You Ms. Nuno for all you have done  
One hour of you equals endless fun
